

PS 2.2

**SECURING THE FUTURE OF HEALTH AND WELL-BEING FOR ALL AT ALL
AGES: SUSTAINABLE FINANCING SOLUTIONS**

| BACKGROUND

The global health landscape continues to evolve, presenting new challenges and opportunities due to demographic transitions and regime changes, including ageing populations, urbanization, and migration. The recent geopolitical context further complicates this scenario, influencing domestic resource allocation, financial and technical support from leading donor agencies, and the stability of multilateral systems worldwide. These shifts demand transformative approaches to sustainable financing to ensure that health systems remain robust and responsive to evolving health and care needs.

With only five years left until 2030, addressing the multifaceted aspects of health financing systems is imperative, ensuring that resources are effectively mobilized, allocated, and utilized to achieve universal health coverage (UHC), other health-related sustainable development goals (SDGs), and other global health commitments, including the UN Decade of Healthy Ageing. This session explores strategies for reorienting financing and service delivery around a life course approach, building systems that can equitably pool risks, improving resilience to external shocks, and aligning public investment with evolving population needs and social goals.

| OBJECTIVES

- Examining how demographic shifts, particularly ageing populations, changing employment patterns, and urbanization, challenge the sustainability of domestic health financing systems.
- To explore how a life course approach can inform strategic priority setting and resource allocation across different age groups and the population's health needs.
- To identify country experiences and innovative strategies for core health financing functions (i.e., revenue raising, pooling, purchasing, benefit design) that enhance financial sustainability, equity, and responsiveness to health and care needs across the life course.
- To identify country experiences and innovative strategies for core health financing functions (i.e., revenue raising, pooling, purchasing, benefit design) that enhance financial sustainability, equity, and responsiveness to health and care needs across the life course.

Panelist

Ghina Fadhilla

Project Officer

Center for Indonesia's Strategic Development Initiatives (CISDI)
Indonesia

Ghina is a Program Officer with around six years of experience in project management and external relations across various NGO sectors, including public health, environment, and youth leadership. She is currently involved in an air pollution campaign in the Greater Jakarta Area, working to increase community awareness about the dangers of air pollution and effective ways to protect themselves. Most recently, she and her colleagues at CISDI authored a strategic paper on strengthening the role of philanthropy in the health sector, highlighting the growing potential of local philanthropy in Indonesia amid declining official development assistance.
