

**PMAC** PRINCE MAHIDOL  
AWARD CONFERENCE **2026**

## **PS 2.2**

**SECURING THE FUTURE OF HEALTH AND WELL-BEING FOR ALL AT ALL  
AGES: SUSTAINABLE FINANCING SOLUTIONS**

## | BACKGROUND

The global health landscape continues to evolve, presenting new challenges and opportunities due to demographic transitions and regime changes, including ageing populations, urbanization, and migration. The recent geopolitical context further complicates this scenario, influencing domestic resource allocation, financial and technical support from leading donor agencies, and the stability of multilateral systems worldwide. These shifts demand transformative approaches to sustainable financing to ensure that health systems remain robust and responsive to evolving health and care needs.

With only five years left until 2030, addressing the multifaceted aspects of health financing systems is imperative, ensuring that resources are effectively mobilized, allocated, and utilized to achieve universal health coverage (UHC), other health-related sustainable development goals (SDGs), and other global health commitments, including the UN Decade of Healthy Ageing. This session explores strategies for reorienting financing and service delivery around a life course approach, building systems that can equitably pool risks, improving resilience to external shocks, and aligning public investment with evolving population needs and social goals.

## | OBJECTIVES

- Examining how demographic shifts, particularly ageing populations, changing employment patterns, and urbanization, challenge the sustainability of domestic health financing systems.
- To explore how a life course approach can inform strategic priority setting and resource allocation across different age groups and the population's health needs.
- To identify country experiences and innovative strategies for core health financing functions (i.e., revenue raising, pooling, purchasing, benefit design) that enhance financial sustainability, equity, and responsiveness to health and care needs across the life course.
- To identify country experiences and innovative strategies for core health financing functions (i.e., revenue raising, pooling, purchasing, benefit design) that enhance financial sustainability, equity, and responsiveness to health and care needs across the life course.

Panelist

## Festus Susilo

*Chief Executive Officer*

Mitra Plumbon Healthcare  
Indonesia

Dr. Festus Susilo is the CEO of Mitra Plumbon Healthcare, a leading private hospital group in Indonesia managing 2,300 beds, focused on serving social insurance patients.

Dr. Susilo earned his medical degree from the University of Indonesia, followed by postgraduate studies in healthcare management and neurosurgery residency program.

As a practicing neurosurgeon equipped with both clinical expertise and strategic management capability, Dr. Susilo has integrated technology and sustainability across healthcare operations. Under his leadership, Mitra Plumbon has expanded its reach while strengthening its commitment to providing high-quality, affordable, and inclusive healthcare services for diverse communities.

Driven by a passion for healthcare reform and a dedication to improving community well-being, Dr. Susilo has become a prominent figure in Indonesia's healthcare landscape, working to ensure that accessible and patient-centered care remains at the core of Mitra Plumbon's mission.
