

Cross Border Digital Initiative in Support of Migrants on the Move Across Asia-Pacific

Problem Statement

- Resurgent of vaccine-preventable diseases (Polio, Cholera, Measles).
- Risks for unvaccinated migrant children and local populations.

Digital Solutions

LACPASS Digital Health Card

- ~ Started as COVID-19 certificate, now expanded to cover all immunization records and International Patient Summary.
- ~ Helps migrant parents keep vaccination records safe while on the move.

GIS Mapping Tools

- ~ Participatory mapping of unofficial border crossings.
- ~ Identifies settlements near informal crossings for targeted health services.

Impact:

- Protects children and communities.
- Strengthens cross-border collaboration.
- Supports planetary health and justice.

CROSS BORDER DIGITAL INITIATIVE in support of migrants on the move Across Asia-Pacific

Vaccine-preventable disease resurgence

- Polio, cholera, measles

Digital Health Card (LACPAS)

Covers all immunizations

Participatory GIS mapping

Spatial data on migration

International cooperation

UNICEF, WHO, etc.
